Disappearing Series Round 5.5" In-Wall Speaker

DI5.5R

SKU: 55222 UPC: 93207063756

Definitives in-ceiling DI 5.5R speakers feature near-invisibility thanks to their small diameters, hidden flange design, and low profile micro-perf grilles. They are as easy to install as traditional flanged flush-mount speakers, and don't require custom sheetrock/spackle skills to install yet they are practically invisible. The DI 5.5R grille is a mere 7-3/8 inches (18.62 centimeters) in diameter, about the same visible size as competitive nominal 5-1/4-inch in-ceiling speakers.

Features:

- In-ceiling speaker
- Simple conventional installation, no spackle work required
- Latest generation balanced double surround system (BDSS) drivers for audiophile-grade sound quality
- Pivoting pure aluminum dome tweeters
- Axially aligned design ensures broad, balanced coverage area
