Wi-Fi Enabled Smart Light Wall Switch

IDEV0008

SKU: 166210

Experience the ultimate in sophisticated design with the iDevices Wall Switch. This Wi-Fi®-enabled smart switch allows for single pole setup, or use multiple Wall Switches for 3- and 4- way functionality, providing unparalleled flexibility anywhere in your home. Conveniently schedule and operate lighting, ceiling fans and more with remote access and voice control through Siri®, Alexa and the Google Assistant.

Features

- **VOICE CONTROL:** Responds to Alexa, Siri, and Google Assistant voice commands (voice assistant sold separately)
- **ACCESS ANYWHERE:** Control your home's lighting and switched accessories from anywhere using any iOS/Android device and the devices Connected app, no hub or additional hardware required
- **SEAMLESS CONTROL:** Wall Switch works in single pole, 3- and 4-way setups. In 3- and 4-way setups, all secondary switches must also be devices Wall Switches, which pair via Bluetooth for a simple and seamless connection. Bluetooth connection distance varies based on environmental factors - visit the devices support portal for more information
- **WORKS WITH IFTTT:** Do even more with Wall Switch by connecting to hundreds of apps and web services for whole home automation
